

Dishin' DERT ☺

Back to School 2014

CAT Demonstration Success!!!

This summer we visited Caterpillar Building AC to show our appreciation for their sponsorship! Our team showed last year's large Aerial Assist competition robot and explained what FIRST is and what it means to our students. As a result, many Caterpillar employees attended our presentation and several showed interest in becoming mentors for our team. Mr. Shea and Mr. Jang recently joined and we're hoping to see new faces joining our team soon!

New Toy Car for Disabled Children

A family from the Dunlap High School Band generously donated their child's used toy car to the Dunlap Eagles Robotics team so that it might be fixed and used for another child. It will be interesting to see what happens once DERT works its magic on it!

Freshman Orientation Night

DERT was able to recruit several new members at Freshman Orientation Night! We have welcomed our new members with open arms, as you can see in the pictures from their first meeting with the team. Our subteams are looking forward to teaching them all about the basics of being on a robotics team during our classes this fall!
